Udaya Anudeep

Senior DevOps Engineer | Site Reliability Engineer | CI/CD Platform | Azure | Middleware

Hyderabad, India | +91-9110561327 | muvsanudeep@gmail.com | linkedin.com/in/anudeep-udaya | Portfolio: https://udayanudeep.github.io/

PROFESSIONAL SUMMARY

Senior DevOps Engineer and Site Reliability Engineer with 7+ years of experience building, automating and operating enterprise CI/CD platforms and production infrastructure for a global bank (Northern Trust). Leads GitHub Actions delivery for 100+ applications migrating from Atlassian Bamboo and Bitbucket, supports CI/CD and DevSecOps across 15,000+ repositories on GitHub Enterprise (EMU), and runs the self-hosted GitHub Actions runner platform on RHEL, Windows and cloud. Keeps 2,000+ Windows Server and RHEL servers available and patch-compliant using Datadog, Dynatrace, Prometheus, Splunk and the ELK Stack, and reduces toil with Ansible, Shell scripting and GitHub workflows, cutting maintenance-window time by 80%. Strong middleware background (Oracle WebLogic, Apache Tomcat, IBM WebSphere), ITIL incident, change and problem management, disaster recovery and Major Incident response. Leads teams and owns the DevOps tower end to end; previously headed a 14-member nearshore team supporting 500+ developers. Microsoft Certified: DevOps Engineer Expert (AZ-400) and Azure Administrator Associate (AZ-104).

KEY ACHIEVEMENTS

- Led GitHub Actions pipeline delivery for 100+ applications during the enterprise migration from Atlassian Bamboo and Bitbucket to GitHub Enterprise.
- Reduced maintenance-window time by 80% through Ansible, Shell scripting and GitHub workflow automation.
- Supported CI/CD for 15,000+ repositories and 500+ developers; maintained availability and patch compliance across 2,000+ servers.
- Built and operate the self-hosted GitHub Actions runner platform with multi-agent hosting, capacity planning and disk management.
- Designed a ServiceNow catalog and approval workflow with CMDB integration for GitHub Enterprise repository archival and deletion.
- Leading teams and owning the DevOps tower; headed a 14-member nearshore middleware and DevOps team in Guadalajara, Mexico.

PROFESSIONAL EXPERIENCE

IT Analyst (Senior DevOps Engineer / SRE) | Tata Consultancy Services

Hyderabad, India | Dec 2025 - Present | Client: Northern Trust (Global Banking and Financial Services)

- Own the DevOps tower for the account, leading the team and driving CI/CD, runner platform and automation priorities with client stakeholders.
- Lead delivery of GitHub Actions CI/CD pipelines for 100+ applications migrating from Atlassian Bamboo and Bitbucket.
- Build and maintain CI/CD pipelines and workflows across 15,000+ repositories on GitHub Enterprise (EMU), integrated with code scanning, security and deployment platforms.
- Set up and maintain self-hosted GitHub Actions runners on RHEL, Windows and cloud, including multi-agent hosting, capacity planning and disk space management.
- Build automation with Shell scripting, Ansible and GitHub workflows, cutting maintenance-window time by 80%.
- Maintain high availability of 2,000+ Windows Server and RHEL servers using Datadog, Dynatrace, Prometheus and the ELK Stack.
- Patch Oracle WebLogic, Apache Tomcat and Java JDK for vulnerability remediation across 2,000+ servers; automate SSL/TLS certificate installation with Venafi.
- Administer and performance-tune clustered Oracle WebLogic (11g/12c/14c) and Apache Tomcat, including JVM heap, thread and connection pools, JDBC, JMS, SSL/TLS and EAR/WAR deployments.
- Designed a ServiceNow catalog request and approval workflow with CMDB integration for archiving and deleting GitHub repositories.
- Troubleshoot CI/CD pipeline, build and runner failures to meet release deadlines; support Docker, Bamboo, Bitbucket, Jira, Sonatype Nexus and SonarQube.
- Execute planned and unplanned disaster recovery (DR) exercises; handle ServiceNow incident, service request and change management, including Major Incident and SWAT calls.

IT Analyst (DevOps Engineer and Team Lead) | Tata Consultancy Services

Guadalajara, Mexico | Sep 2024 - Dec 2025 | Client: Northern Trust

- Led a 14-member nearshore team and owned the middleware and DevOps tower, including work allocation, escalations, client communication and delivery quality.
- Wrote and maintained Bamboo CI/CD pipelines; supported 500+ developers on Sonatype Nexus, SonarQube and Bitbucket.
- Managed Docker Swarm for containerized application hosting; automated SSL/TLS certificates with Venafi and daily operations with Shell scripting and Ansible.
- Administered Jira and Confluence upgrades; built a Power BI dashboard for inventory and maintenance tracking.

- Performed Oracle WebLogic and Apache Tomcat security patching; worked with OS, VMware and network teams on firewall, DNS, F5 load balancer and hardware issues.

Middleware and DevOps Administrator | Tata Consultancy Services

Guadalajara, Mexico | Dec 2021 - Sep 2024 | Client: Northern Trust

- Wrote and maintained Bamboo CI/CD pipelines; installed and maintained Bamboo, Docker, Bitbucket, Nexus, SonarQube, Jira, Confluence, Oracle WebLogic, Apache Tomcat, Oracle SOA, IBM WebSphere and Apache HTTP Server.
- Managed ServiceNow incident, service request, change, problem and CMDB processes; participated in Major Incident and SWAT calls.

System Engineer (Middleware Administrator) | Tata Consultancy Services

Hyderabad, India | Jun 2019 - Dec 2021 | Client: Northern Trust

- Administered Oracle WebLogic, Apache Tomcat, Oracle SOA/OSB, IBM WebSphere and Apache HTTP Server for 150+ Java applications across production and non-production.
- Monitored server performance with APM tools, SiteScope, Pandora FMS and Splunk; supported Akamai CDN configuration; developed automation scripts and mentored junior engineers.

TECHNICAL SKILLS

CI/CD and Source Control: GitHub Actions, GitHub Enterprise (EMU), Self-hosted Runners, Azure DevOps (Azure Pipelines), Atlassian Bamboo, Bitbucket, Git, YAML Pipelines, CI/CD Migration

DevSecOps and Artifacts: SonarQube, Sonatype Nexus, Code Scanning, Vulnerability Remediation, Security Patching, Venafi SSL/TLS Certificate Management

Automation and Configuration Management: Ansible, Shell/Bash Scripting, Python (foundational), GitHub Workflow Automation, Runbooks

Containers and Cloud: Docker, Docker Swarm, Podman, Kubernetes, Microsoft Azure, Azure Log Analytics

Monitoring and Observability: Datadog, Dynatrace, Prometheus, Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), SiteScope, Pandora FMS, APM Tools, Power BI

Reliability and ITSM: Incident, Problem and Change Management (ITIL), Major Incident / SWAT, Disaster Recovery, Capacity Management, ServiceNow (CMDB), Jira, Confluence

Middleware and Messaging: Oracle WebLogic Server 11g/12c/14c, Oracle SOA Suite, Oracle Service Bus (OSB), IBM WebSphere, Apache Tomcat 8/8.5/10, Apache HTTP Server, JDBC, JMS, IBM MQ, Apache Kafka, Solace

Operating Systems and Infrastructure: Red Hat Enterprise Linux (RHEL), Windows Server, VMware, F5 Load Balancers, DNS, Firewall Troubleshooting, Akamai CDN

CORE COMPETENCIES

DevOps Tower Ownership, Team Leadership, CI/CD Pipeline Automation, Build and Release Automation, Pipeline Migration, DevSecOps, Source Code Management, Artifact Management, Code Quality, Configuration Management, Infrastructure Automation, Containerization, Monitoring and Observability, High Availability, Disaster Recovery, Security Patching, Vulnerability Remediation, Middleware Administration, Application Server Performance Tuning, Incident, Change and Problem Management, Production Support, Banking and Financial Services (BFSI)

EDUCATION

B.Tech, Electrical and Electronics Engineering

VR Siddhartha Engineering College, Vijayawada, India | 2019

CERTIFICATIONS

- Microsoft Certified: DevOps Engineer Expert (AZ-400)
- Microsoft Certified: Azure Administrator Associate (AZ-104)

TRAINING AND ADDITIONAL LEARNING

Programming for Everybody (Getting Started with Python); Python Programming: A Concise Introduction; Web Design for Web Developers; Git Started with GitHub; Git and GitHub Crash Course
