7+ yrs	100+	15,000+	2,000+	80%
enterprise DevOps & SRE	apps moved to GitHub Actions	repositories supported	servers kept available	less maintenance time

PROFILE

Senior DevOps Engineer and SRE with 7+ years building, automating and operating enterprise CI/CD platforms and production infrastructure for a global bank (Northern Trust). Leads GitHub Actions delivery for 100+ applications migrating from Atlassian Bamboo/Bitbucket, supports CI/CD and DevSecOps across 15,000+ repositories on GitHub Enterprise (EMU), and runs the self-hosted runner platform on RHEL, Windows and cloud. Keeps 2,000+ Windows Server and RHEL servers available and patch-compliant with Datadog, Dynatrace, Prometheus, Splunk and ELK, and cuts toil with Ansible, Shell and GitHub workflows (maintenance windows down 80%). Deep middleware background (Oracle WebLogic, Tomcat, WebSphere), ITIL incident/change/problem management, DR exercises and Major Incident response. Leads teams and owns the DevOps tower end to end, previously heading a 14-member nearshore team supporting 500+ developers. Microsoft Certified AZ-400 and AZ-104.

KEY ACHIEVEMENTS

- Led GitHub Actions pipeline delivery for **100+ applications** in the enterprise move off Atlassian Bamboo and Bitbucket.
- Supported CI/CD for **15,000+ repositories** and **500+ developers** on GitHub Enterprise (EMU).
- Built and run the self-hosted GitHub Actions runner platform: multi-agent hosting, capacity and disk management.
- Leading teams and owning the **DevOps tower**; headed a **14-member** nearshore middleware and DevOps team in Guadalajara, Mexico.
- Cut maintenance-window time by **80%** with Ansible, Shell and GitHub workflow automation.
- Kept **2,000+ servers** (Windows Server, RHEL) available and patch-compliant.
- Designed a ServiceNow catalog and approval workflow with CMDB integration for repository archival governance.
- Ran DR exercises and Major Incident / SWAT calls for banking production systems.

EXPERIENCE

IT Analyst – Senior DevOps Engineer / SRE CURRENT

Dec 2025 – Present

Tata Consultancy Services · Hyderabad, India · Client: Northern Trust (Global Banking & Financial Services)

- Own the DevOps tower for the account, leading the team and driving CI/CD, runner platform and automation priorities with client stakeholders.
- Lead delivery of GitHub Actions pipelines for 100+ applications migrating from Atlassian Bamboo and Bitbucket; build and maintain CI/CD across 15,000+ repositories integrated with code scanning, security and deployment platforms.
- Set up and maintain self-hosted GitHub Actions runners on RHEL, Windows and cloud, including multi-agent hosting, capacity planning and disk management; troubleshoot pipeline, build and runner failures to protect release deadlines.
- Built Shell and Ansible automation orchestrated through GitHub workflows, cutting maintenance-window time by 80%.
- Maintain availability of 2,000+ Windows Server and RHEL servers with Datadog, Dynatrace, Prometheus and ELK; respond to alerts and drive issues to resolution.
- Patch Oracle WebLogic, Apache Tomcat and Java JDK across 2,000+ servers; automate SSL/TLS certificate installation with Venafi.
- Administer and performance-tune clustered WebLogic (11g/12c/14c) and Tomcat: Admin/Managed Servers, Node Manager, JVM heap, thread and connection pools, JDBC, JMS, SSL/TLS and EAR/WAR deployments.
- Designed a ServiceNow catalog request and approval workflow with CMDB integration for archiving and deleting GitHub Enterprise repositories.
- Run Major Incident and SWAT calls, planned and unplanned DR exercises, and ServiceNow incident, request and change management.

IT Analyst – DevOps Engineer & Team Lead

Sep 2024 – Dec 2025

Tata Consultancy Services · Guadalajara, Mexico · Client: Northern Trust

- Led the 14-member nearshore team and owned the middleware and DevOps tower: work allocation, escalations, client communication and delivery quality.
- Wrote and maintained Bamboo CI/CD pipelines; supported 500+ developers on Sonatype Nexus, SonarQube and Bitbucket.
- Managed Docker Swarm hosting; automated SSL/TLS certificates with Venafi and daily operations with Shell and Ansible.
- Administered Jira and Confluence upgrades; built a Power BI dashboard for inventory and maintenance tracking.
- Worked with OS, VMware and network teams on firewall, DNS, F5 load balancer and hardware issues during Major Incident and SWAT calls.

Middleware and DevOps Administrator

Dec 2021 – Sep 2024

Tata Consultancy Services · Guadalajara, Mexico · Client: Northern Trust

- Wrote and maintained Bamboo CI/CD pipelines; installed and maintained Bamboo, Docker, Bitbucket, Nexus, SonarQube, Jira, Confluence, WebLogic, Tomcat, Oracle SOA, WebSphere and Apache HTTP Server.
- Managed ServiceNow incident, service request, change, problem and CMDB processes; patched WebLogic and Tomcat for vulnerability remediation.

System Engineer – Middleware Administrator

Jun 2019 – Dec 2021

Tata Consultancy Services · Hyderabad, India · Client: Northern Trust

- Administered Oracle WebLogic, Tomcat, Oracle SOA/OSB, IBM WebSphere and Apache HTTP Server for 150+ Java applications across production and non-production.
- Monitored with APM tools, SiteScope, Pandora FMS and Splunk; supported Akamai CDN configuration; wrote scripts that improved efficiency; mentored junior engineers.

TECHNICAL SKILLS

CI/CD & Source Control	GitHub Actions, GitHub Enterprise (EMU) admin, self-hosted runners, Azure DevOps (Pipelines), Atlassian Bamboo, Bitbucket, Git, YAML pipelines, CI/CD migration
DevSecOps & Artifacts	SonarQube, Sonatype Nexus, code scanning integration, vulnerability remediation, security patching, Venafi SSL/TLS automation
Automation	Ansible, Shell/Bash, Python (foundational), GitHub workflow automation, runbooks
Containers & Cloud	Docker, Docker Swarm, Podman, Kubernetes, Microsoft Azure, Azure Log Analytics
Observability	Datadog, Dynatrace, Prometheus, Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), SiteScope, Pandora FMS, APM tools, Power BI
Reliability & ITSM	Incident, problem and change management (ITIL), Major Incident / SWAT, disaster recovery, capacity management, ServiceNow (CMDB), Jira, Confluence
Middleware & Messaging	Oracle WebLogic 11g/12c/14c, Oracle SOA Suite, Oracle Service Bus, IBM WebSphere, Apache Tomcat 8/8.5/10, Apache HTTP Server, JDBC, JMS, IBM MQ, Kafka, Solace
Infrastructure	RHEL/Linux, Windows Server, VMware environments, F5 load balancers, DNS, firewall troubleshooting, Akamai CDN

CREDENTIALS

CERTIFICATIONS

Microsoft Certified: DevOps Engineer Expert (AZ-400)

Microsoft Certified: Azure Administrator Associate (AZ-104)

EDUCATION

B.Tech, Electrical and Electronics Engineering

VR Siddhartha Engineering College, Vijayawada · 2019

TRAINING

Programming for Everybody (Python); Python Programming: A Concise Introduction; Web Design for Web Developers; Git Started with GitHub; Git & GitHub Crash Course

CORE COMPETENCIES

DevOps tower ownership · Team leadership · CI/CD pipeline automation · Build & release · Pipeline migration · DevSecOps · Source code & artifact management · Code quality · Configuration management · Infrastructure automation · Containerization · Monitoring & observability · High availability · Disaster recovery · Security patching · Vulnerability remediation · Middleware administration · App server performance tuning · Incident, change & problem management · Production support · BFSI domain
